230 RAMS

Pooginook's Goal

We aim to provide advanced Merino genetics that result in profitable Merino flocks for our clients.

Auction Registration

All prospective buyers must register by 11am on the sale day. Outside agents are welcome and must register prospective buyers by 11am on the sale day to gain a rebate.

Delivery

Sheep sold on the day must be taken from Pooginook by Monday 10 October 2011. All care will be taken of the rams however responsibility for loss or injury will be borne by the vendor from the fall of the hammer. We recommend Livestock Insurance for all rams.

Fibre Diameter Analysis

Riverina Wool Testers using CSIRO Laser Scan tested the rams on 16 August 2011. The rams had 4.5 months wool growth at the time. This information should be used only as a guide. Paraway Pastoral Company Limited accepts no responsibility for the accuracy.

Health Status

Pooginook is Brucellosis Accredited Free Flock and has Nationally Accredited Johnes Disease Market Assurance Status MN3.

The Pooginook Stud Flock has Owner declared footrot free status.

Auction Selling Agent

Landmark Mills Finley.
Pooginook rams are sold exclusive of GST.

Pooginook Semen Marketing Policy

All Pooginook Merino rams purchased are sold under the condition that 100% of the semen marketing rights are retained by Paraway Pastoral Company Limited.

If you purchase a Pooginook Ram:

1. The purchaser/s must be nominated at the point of sale.
2. You can use semen by the ram for your own flock requirements.
3. Under this selling agreement you are not permitted to market semen from the ram.
4. Semen marketing rights can be negotiated with Paraway Pastoral Company Limited.
5. If the ram is re-sold the purchaser must be made aware that the semen marketing rights are retained by Paraway Pastoral Company Limited.

Welcome to the 2011 Pooginook Merino and Poll Ram Sale

*“It is our aim to make your flock
the most profitable in your district”*

John Sutherland 2011

The Pooginook Polls are introduced to the sale this year to compliment the unique Pooginook Merinos. Both the Merinos and the Polls are a dual purpose sheep; combining good growth, high fertility and excellent wool production. David Taylor selected the Pooginook Merino ewes to form the foundation of the Pooginook Polls flock.

We were delighted with the performance and results of the three Pooginook client flock's in the 2010 - 2012 Peter Westblade Memorial Merino Challenge. Eric and Dianne McKenzie of Buthungra, NSW, were awarded first place for their flock in the 2011 Wool Challenge and net return per hectare based on the last five years average meat and wool prices.

Pooginook currently has sires entered in Sire Evaluation and is participating in the Sheep CRC research Information Nucleus Flock project. In the Armidale Central Test Sire Evaluation, one of the Pooginook sires, Malcolm (072032), has performed very well for combined measured traits and above average for visual traits with 11% more tops and 14% less culls than the average.

This year's catalogue has 'across flock' Australian Sheep Breeding Values

(ASBVs) data to assist ram buyers in their ram selection. The usual micron information on each ram is also available to assist with visual selection. The MERINOSELECT (Sheep Genetics) Dual Purpose seven percent Index (DP7%) ranks the rams on their ability to produce progeny with a high emphasis on early growth and fertility, with moderate emphasis on micron reduction and increasing fleece weight.

I hope you have a successful day at the sale and I welcome you to be part of the Pooginook vision for Merino breeding.

Yours sincerely,

John Sutherland
Pooginook Business Manager

Average of Lot 1 to 232

FD	CV	SD	CF	BWT
19.6	15.6	3.1	99.4	79

- Rams born mid June 2010
- Wool mid side tested 16 August 2011
- Shorn and fleece weighed 1 April

Measured Performance Data

Sire	Sire of ram (See sire reference)
FD	Fibre diameter (Laser scan micron test)
CV	Coefficient of variation of fibre diameter
SD	Standard deviation of fibre diameter
CF	Comfort factor (No. of fibres under 30 micron)
BWT	Current bodyweight 2010 drop rams in kilograms

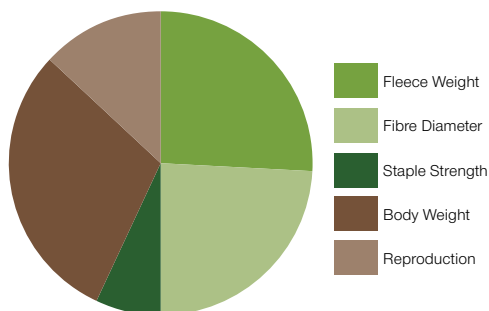

Australian Sheep Breeding Values 'within' the Pooginook 2010 drop rams

Pooginook has been benchmarking itself across the industry through entry of sires into sire evaluations and the Sheep CRC Information Nucleus flock. This has put the Pooginook flock in the position to have ASBVs 'across' flock for our sale rams. This year we are offering across flock ASBVs that will assist you with your ram selections.

Index

The relevant weightings on the MERINOSELECT Dual Purpose 7% Index are:

YWT	Animals with a positive figure will produce lambs that grow faster. Data is in kilograms.
YFD	Yearling Fibre Diameter. A negative figure in fibre diameter measured as a yearling at 300 days means the ram is carrying the genes to reduce fibre diameter at hogget age in its progeny. Data shows difference in micron.
YFDCV	Yearling Coefficient of Variation is taken when microns are measured as a yearling at 300 days. Data shows difference in percentage of CV.
YCFL	Yearling Clean Fleece Weight. A ram with a positive figure is more likely to produce progeny with a higher fleece weight. Data shows difference in percentage of clean fleece weight.
Index	A Dual Purpose 7% index is a guide with a high emphasis on improving reproduction and bodyweight whilst making small gains in fibre diameter and fleece weight.

Tips for Production of Commercial Merinos

- Shear rams twice per year and keep rams in Score 3-4. Ensure ewes are Score 3-4 at mating and on a rising plain of nutrition
- Check rams physical soundness
- 2.00% mature rams only joined to maiden ewes
- Join rams @ 1.25% to 1.50% to mature ewes
- Join for 6 weeks only and use wether teasers
- Scan 6 weeks after rams are out
- Ensure single lambers remain in Score 3 condition and ensure twin lambers graze the best pasture and Score 3-4 condition
- Maiden ewes require extra nutrition to achieve good production
- Bait foxes prior to and during lambing and use Alpacas as guardians
- 2 weeks prior to lambing separate twin bearing ewes into mobs less than 200 and single bearing ewes into mobs less than 500
- Twin ewes perform best with multiple watering points, good shelter and best available pasture
- Separate wet ewes from dry ewes at marking
- Wean lambs when the oldest lamb is 12 to 14 weeks
- 6:1 vaccinate for 2nd time and drench onto fresh pasture and periodic worm resistance test
- Use Alpacas in weaner lambs
- Body weigh weaners and monitor over summer months. Don't forget to monitor worm burden
- Ensure weaners achieve targeted body weights up to 12 months
- As a guide maintain weaners at Score 3 and aim for 50kg at 12 months

Tips for Production of Commercial Merinos

Ram Care Guide

Your rams are an investment in advanced sheep and wool production.

General Care of Rams

- Run in a paddock with other Merino rams with good pasture. PGK rams are Accredited Brucellosis free and National Accredited Johnes Disease Market
- Assurance Status MN3 avoid running them with Prime Lamb sires
- Shear rams twice a year
- Apply fly preventative chemical around horns prior to joining
- Drench to a program. We recommend worm testing before drenching
- Graze in a well watered, well sheltered, good paddock all year around
- We recommend an annual vaccination of 6:1

Eight Weeks Prior to Joining

- Feed 400-500gms of lupins a day
- Shear rams 8-10 weeks prior to joining
- We recommend the use of teasers if joining October to December
- Check for testicle abnormalities and size

After Joining

- If necessary supplement feed and put rams in a good paddock to regain condition
- Maintain sires at Score 3
- Class rams annually and check for soundness
